

Project platforms for capitalisation

Central Baltic Annual Event 15.11.2018

What is a project platform?

- A project platform is a framework for cooperation of different projects
- Can include projects that utilise different financing sources
- Usually formed by core partners of existing projects
- Cooperation within a certain thematic field

Goals of a project platform

- Dissemination of information
- Contribution to capacity building
- Increasing the effects of projects and their results
- Spreading best practises

Platform activities

- Implemented as a separate project
- Meetings, seminars
- Defining joint approaches, policy papers, agreements, models, exchanging information and data
- Networking

Funding

- Baltic Sea Region programme
- Second call for project platforms ongoing
 - Research and Innovation Structures
 - Smart Specialisation
 - Marine Litter Management
 - Management of Marine Space
- Six projects funded from the first call
 - Several Central Baltic projects involved
