

# BaltCOP

*BaltCOP aims to create a ripple effect of change for **nutrient reduction** and **ecosystem restoration** through the **catchment officer approach**, leading to a healthier Baltic Sea.*

## BaltCOP will:

- Build knowledge and capacity in catchment coordination and restoration.
- Conduct pilot actions in **Estonia, Latvia** and **Sweden**, tailored to each country's context.
- Help embed catchment officers into national water management and create toolkits for them.

### BUDGET

€2 336 088  
EU funding

### START

June 2024

### END

May 2027

Visit our  
project  
website

## PROJECT PARTNERS

WWF Sweden – **Lead partner**

Nyköping's Rivers Water  
Conservation Association (NVVF)

Estonian Fund for Nature (ELF)

Pasaules Dabas Fonds (PDF)

Latvian University of Life Sciences  
& Technologies (LBTU)

## What are catchment officers?

People who coordinate activities across a watershed, acting as a bridge between stakeholders. They are key to accelerating restoration, which reduces nutrient runoff to the sea.
