

# Export to International NGOs

# PROJECT CORE

The annual market for procurements from large international Non-Governmental Organizations, such as the United Nations, Red Cross, IMF, World Bank, etc., amounts to a substantial \$20 billion. Despite this immense potential, numerous companies in the Central Baltic countries remain unaware of the sales and growth opportunities these markets present.

Addressing this challenge, the *Promoting Exports to International NGOs* (INGOs) project offers small and medium-sized enterprises (SMEs) a comprehensive range of services. These services serve the project's primary objective: to equip SMEs with the necessary tools to secure contracts with international non-governmental organizations.
